ABSTRACT

Masterpiece of Tokens

Yoozico was born June 1st 2021 with the goal of being a decentralized meme project with a purpose. Yoozico is a serious mission to rescue someone in need, bring crypto adoption to the main stream with new concepts such as rewards, NFTS, decentralized exchanges, and credit card for crypto payment on our website.

Within the first 21 Days of birth Yoozico made history surpassing 100,000+ holders.

⇌ **Yoozico Swap**

We are one of the first meme coins to offer a live decentralized swap directly on our website right after launch.

👉 **Yoozico Card Pay**

We are one of the first meme coins to offer credit card for crypto payments directly on our website.

👛 **Yoozico Paw Wallet**

On our road map our paw wallet will have users track their rewards gained from reflections, wallet balance, coin valuation, and more.

📦 **Yoozico NFTs**

Our largest project in the works is our NFT marketplace. We will allow users to create and buy/auction their own NFTs and plan to allow users to donate a % to helping .

👉 **Yoozico Swag**

A merchandise store for \$Yoozico holders to proudly support their favorite thing in the real world with the proceeds to benefit the project and help more people in need.

Value

TRANSPARENCY

Yoozico is decentralized and supported by its community of enthusiasts. We encourage open communication and believe trust, transparency, and community are the 3 pillars to building longevity.

COMMUNITY

Yoozico is one of the fastest growing and most loved communities in crypto we believe that only together we are strong. Community is everything and Yoozico strives to include everyone from around the globe. We have multiple telegram channels dedicated to our international communities.

Trust

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts. Yoozico has been audited by a third party dessert finance and has burned and locked majority of the LP tokens. No rug pulls here only cute Yoozico's.

LONGEVITY

Yoozico is in for the long haul. The decentralized community is fostering and adopting long term development of the ecosystem and foundation in efforts to drive real use cases.

Yoozico

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC

offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the BinanceTeam called BEP-20. Known for 5 second block speeds much faster than doge with 1 minute block speeds. These 2 articles compare block speed:

Bep-20/BSC 5 seconds:

Advantages of the Binance smart chain are:

It's a proprietary blockchain, which will provide security and safety to all users and developers. Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions. Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Ecosystem

Community-Powered

Yoozico is decentralized and owned by its fun, vibrant community. We welcome and embrace diverse perspectives to build Yoozico into the best community in crypto. With a do-good mission of helping save someone in need.

Community-Powered

For every transaction in the Yoozico network a 5% fee is distributed to existing holders. That means you earn more Yoozico just by holding it in your wallet.

Locked LP

Initial Liquidity tokens are burned and locked. Additionally, 5% of all transaction fees are added to liquidity.

Here you can view LP holders:

4

Yoozico Protocol

Yoozico employs 3 simple functions: Reflection + LP acquisition + Burn.
In each trade, the transaction is charged a 10% fee, which is split 2 ways.

5%

5% fee = redistributed to all existing holders.

5%

5% fee is split 50/50 half of which is sold by the contract into BNB, while the other half of the Yoozico tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

5%

30%+ of the total supply has been burned so far so 30%+ of the 5% redistributions are burned with every transaction.
